

From Novice to Master – Conquering Coding Nuances for the Gynecologic Oncologist

Overview

This masterclass addresses ongoing challenges in gynecologic oncology coding as clinical complexity continues to intersect with evolving regulatory requirements. Through case-based sessions, participants will explore CMS rules, split/shared visit guidelines, and multi-step surgical coding for gynecologic malignancies, while deepening their knowledge to support compliance, accurate reimbursement, and practice sustainability.

Audience

Gynecologic oncologists, fellows, advanced practice providers, and coding professionals who support gynecologic oncology practices

Faculty

Members of the SGO Coding and Reimbursement Committee

Learning Objectives

- Describe the CPT® code development process and its impact on gynecologic oncology practice
- Recognize and apply CMS regulations for split/shared visits in compliance with current policy
- Identify strategies for coding complex gynecologic oncology surgical cases
