

SGO Early Career Summit

Overview

Early career physicians are at a critical time in their professional development and benefit from tailored, evidence-based career development opportunities. Building on insights from the SGO Early Career Summit Needs Assessment, this Masterclass is designed to provide targeted education and guidance to support success while addressing the following areas:

- Future of the field: Anticipated changes in gynecologic oncology and proactive strategies to adapt and lead through transformation
- Career exploration: Dedicated tracks highlighting various professional pathways, including clinician-scientist, medical educator, clinical trialist, private practitioner, industry professional, and hospital administrator
- Leadership development: Strategies for advancement and leadership growth within each career trajectory

In addition, this Masterclass fosters engagement with SGO leadership and offers valuable mentorship and networking opportunities.

Audience

Early-career oncology clinicians (less than 10 years in practice), including gynecologic oncologists, medical oncologists, radiation oncologists, and fellows in gynecologic or medical oncology.

Faculty

Megan Hutchcraft, MD; Tracilynn Hall, MD; Nicholas Taylor, MD; and other faculty, TBD

Learning Objectives

- Examine anticipated changes to the profession of gynecologic oncology and propose a framework to incorporate these changes into practice.
- Equip participants with strategies to navigate different career pathways.
- Discuss pathways to administrative leadership as an early career gynecologic oncologist in various career paths.
- Foster professional growth through connection to SGO and opportunities for networking, collaboration, and career advancement.
